

About Stand-by Generators

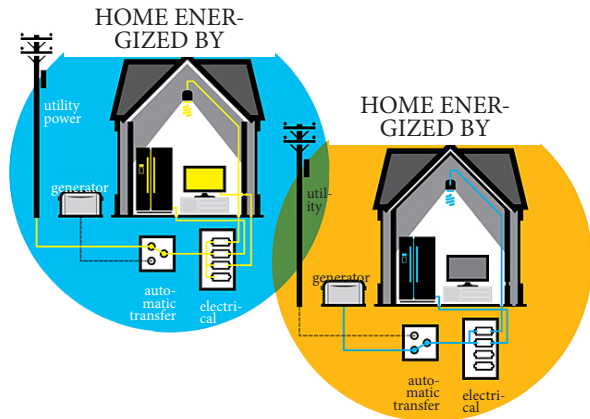

What's the difference between stand-by and portable generators? Stand-by generators are permanently installed appliances, like a compressor for a central air-conditioning system. Its engine runs on natural gas or propane. A portable back-up generator is a small, gas-engine generator that you wheel into position outside the house and plug into the transfer switch. Stand-by units should be sized according to their required wattage use, from essential systems like furnaces and refrigerators to comfort features like lighting and air conditioning.

How do stand-by generators work? Stand-by generators offer fully automatic operation. They're connected to an Automatic Transfer Switch (ATS), which is connected to the main electric panel. When utility power is lost, the ATS activates, collects power from the generator, and sends it back to the main panel. When utility power is restored, the ATS automatically shuts off and reverts the power source back to the main electrical panel.

Featured Model:
Generac 11,000 KW Stand-By Generator Mfg. #7032
*5-year Limited Warranty

Generac's Guardian® Series provides the automatic backup power you need to protect your home & family during a power outage, providing reliability through the most severe outages. The sturdy, steel enclosure has a RhinoCoat™ finish for superior weather protection and is durable enough for all weather conditions.

About East Coast Lumber

Equipment Sales, Rentals & Service

Sales: East Coast Lumber is an authorized sales and service center for many branded manufacturers. From STIHL chainsaws and Bob-Cat mowers to Makita power tools and Generac generators – we're the local store for your power tool and equipment needs.

Rentals: Renting tools & equipment from East Coast Lumber is easy! Our professional staff will assist in choosing the best tool for the job and demonstrate how to operate it safely.

Service: The Service Department at East Coast Lumber is staffed with factory-trained & certified technicians fielding everything from tune-ups on lawn & garden equipment to power tool & small engine repair. We are a certified warranty center for over 15 tool & equipment brands, including Briggs & Stratton, Generac, Kawasaki, Makita, MTD, Timberwolf, and more. East Coast Lumber has a large selection of parts in stock, with access to hundreds more.

Sizing Your Generator

How do I correctly size a stand-by generator for my home?

Armed with some simple information, our sales associates can help you determine what size generator would best meet your family's needs during a power outage. These are some factors to consider when shopping for a generator:

- The size of your home
- Essentials - well or sump pump, furnace, refrigerator, etc.
- Appliances - microwave, stove, dryer, garage door, etc.
- Extras - computers/laptops, wifi, TV, security, etc.

Can I install the generator myself?

Although the Guardian Series systems are prepackaged and pre-wired with comprehensive instructions, we highly recommend hiring a licensed electrician.

Generator Service

East Coast Lumber, an authorized sales & service center for Generac, offers various repair and maintenance services to keep your generator running properly and to give you peace of mind.
